

HIMALAYA INTERNATIONAL SCHOOL

F-Block, Sector – 9, Rohini, Delhi - 85

Circular No. : HIS/24-25/P10

Date:04.12.2024

Dear Parents,

Getting dirty is a part of childhood. But for children in developing countries playing in the dirt can put them at risk of contracting parasitic worms that infests bodies of children below 18 years of age. So, to avoid that risk, the Ministry of Health and Family Welfare (MOHFW) started National Deworming Programme under the flagship programme of Govt. of India long back ago.

We want parents to be the part of this momentum for 2nd round which will be implemented on 09.12.2024 (Monday) – Nursery to VIII. In the said programme, single dose of Albendazole Chewable tablets will be distributed to all schools for students from Class Nursery to Class VIII. The Albendazole tablet will be administered to school children in the presence of class teacher.

Kindly fill the consent form for your approval and submit to class teacher before 07.12.24.
